STATE ASSESSMENT

# From our students...

“Project-based learning has impacted my education through opportunities of new experiences. **I was taught how to find what I’m passionate about before I entered the real world** and was given the freedom to learn it for myself in a hands-on fashion. Through the projects I’ve completed during my high school career, **I’ve grown to my fullest potential** and found my true passion.”

*- Mr. Oppedisano's High School Science Student*

“**The man I look up to is my math teacher Mr. Mack...** He is someone I can really talk to and tell my problems to. He is also an amazing teacher, **the way he teaches is the best I’ve ever seen!** He knows when to be a little funny and **raise class spirits**. But also when to be serious and **teach a good lesson**. Every kid that has his class loves him and thinks he’s the best...”

*- Mr. Mack's Middle School Math Student*

“This class truly challenges me every day... **I am learning to ask questions, work in groups, and work independently with math...** Most days in class I am engaged and excited to be learning math... I had a lot of fun in this class. Math is often a challenge for me, but **I am excited to improve my skills and plunge into the next math course prepared** with the concepts we tackled this year in math class.”

*- Mr. Martin's High School Math Student*

“I think the word that best describes Ms. Sara’s class and how she teaches is “Together” because she is always **teaching us how to work in groups... and be responsible with the task that we take...** She has taught us **how to be professional when we do our work**, to lose our fear, to give our best and **every day she makes us understand how capable we are.**”

*- Ms. Said's High School History Student*
