Smart Schools Investment Plan - Revised - Islip Submission 1

SSIP Overview

Institution ID
800000037206

1.   **Please enter the name of the person to contact regarding this submission.**

Ellen Semel

1a.   **Please enter their phone number for follow up questions.**

6316508210

1b.   **Please enter their e-mail address for follow up contact.**

esemel@islipufsd.org

2.   **Please indicate below whether this is the first submission, a new or supplemental submission or an amended submission of an approved Smart Schools Investment Plan.**

First submission

3.   **All New York State public school districts are required to complete and submit a District Instructional Technology Plan survey to the New York State Education Department in compliance with Section 753 of the Education Law and per Part 100.12 of the Commissioner's Regulations.   Districts that include investments in high-speed broadband or wireless connectivity and/or learning technology equipment or facilities as part of their Smart Schools Investment Plan must have a submitted and approved Instructional Technology Plan survey on file with the New York State Education Department.**
By checking this box, you certify that the school district has an approved District Instructional Technology Plan survey on file with the New York State Education Department.

☑   District Educational Technology Plan Submitted to SED and Approved

4.   **Pursuant to the requirements of the Smart Schools Bond Act, the planning process must include consultation with parents, teachers, students, community members, other stakeholders and any nonpublic schools located in the district.**
By checking the boxes below, you are certifying that you have engaged with those required stakeholders.

☑   Parents
☑   Teachers
☑   Students
☑   Community members

5.   **Did your district contain nonpublic schools in 2014-15?**

☐   Yes
☐   Yes, but they have all since closed, moved out of district or are declining use of SSBA funds
☑   No

6.   **Certify that the following required steps have taken place by checking the boxes below:**

☑   The district developed and the school board approved a preliminary Smart Schools Investment Plan.
☑   The preliminary plan was posted on the district website for at least 30 days. The district included an address to which any written comments on the plan should be sent.
☑   The school board conducted a hearing that enabled stakeholders to respond to the preliminary plan. This hearing may have occured as part of a normal Board meeting, but adequate notice of the event must have been provided through local media and the district website for at least two weeks prior to the meeting.
☑   The district prepared a final plan for school board approval and such plan has been approved by the school board.
☑   The final proposed plan that has been submitted has been posted on the district's website.

6a.   **Please upload the proposed Smart Schools Investment Plan (SSIP) that was posted on the district's website, along with any supporting materials. Note that this should be different than your recently submitted Educational Technology Survey. The Final SSIP, as approved by the School Board, should also be posted on the website and remain there during the course of the projects contained therein.**

smartbond.pptx

6b.   **Enter the webpage address where the final Smart Schools Investment Plan is posted. The Plan should remain posted for the life of the included projects.**

http://www.islipufsd.org/Assets/Departments/20-12-08_Smart-Schools-Investment-Plan_Final.pdf?t=637454571522470000

7.   **Please enter an estimate of the total number of students and staff that will benefit from this Smart Schools Investment Plan based on the cumulative projects submitted to date.**

2,717

8.   **An LEA/School District may partner with one or more other LEA/School Districts to form a consortium to pool Smart Schools Bond Act funds for a project that meets all other Smart School Bond Act requirements. Each school district participating in the consortium will need to file an approved Smart Schools Investment Plan for the project and submit a signed Memorandum of Understanding that sets forth the details of the consortium including the roles of each respective district.**

☐   The district plans to participate in a consortium to partner with other school district(s) to implement a Smart Schools project.

9.   **Please enter the name and 6-digit SED Code for each LEA/School District participating in the Consortium.**

Partner LEA/District	SED BEDS Code
(No Response)	(No Response)

10.   **Please upload a signed Memorandum of Understanding with all of the participating Consortium partners.**

(No Response)

11.   **Your district's Smart Schools Bond Act Allocation is:**

$1,921,404

12.   **Final 2014-15 BEDS Enrollment to calculate Nonpublic Sharing Requirement**

	Public Enrollment	Nonpublic Enrollment	Total Enrollment	Nonpublic Percentage
Enrollment	2,926	0	2,926.00	0.00

13.   **This table compares each category budget total, as entered in that category's page, to the total expenditures listed in the category's expenditure table. Any discrepancies between the two must be resolved before submission.**

	Sub-Allocations	Expenditure Totals	Difference
School Connectivity	0.00	0.00	0.00
Connectivity Projects for Communities	0.00	0.00	0.00
Classroom Technology	324,857.54	324,857.54	0.00
Pre-Kindergarten Classrooms	0.00	0.00	0.00
Replace Transportable Classrooms	0.00	0.00	0.00
High-Tech Security Features	0.00	0.00	0.00
Nonpublic Loan	0.00	0.00	0.00

Smart Schools Investment Plan - Revised - Islip Submission 1

SSIP Overview

	Sub-Allocations	Expenditure Totals	Difference
	324,858	**324,858**	**0**

School Connectivity
_____

1. **In order for students and faculty to receive the maximum benefit from the technology made available under the Smart Schools Bond Act, their school buildings must possess sufficient connectivity infrastructure to ensure that devices can be used during the school day. Smart Schools Investment Plans must demonstrate that:**
   - **sufficient infrastructure that meets the Federal Communications Commission's 100 Mbps per 1,000 students standard currently exists in the buildings where new devices will be deployed, or**
   - **is a planned use of a portion of Smart Schools Bond Act funds, or**
   - **is under development through another funding source.**
   Smart Schools Bond Act funds used for technology infrastructure or classroom technology investments must increase the number of school buildings that meet or exceed the minimum speed standard of 100 Mbps per 1,000 students and staff within 12 months. This standard may be met on either a contracted 24/7 firm service or a "burstable" capability. If the standard is met under the burstable criteria, it must be:
   1. Specifically codified in a service contract with a provider, and
   2. Guaranteed to be available to all students and devices as needed, particularly during periods of high demand, such as computer-based testing (CBT) periods.

   Please describe how your district already meets or is planning to meet this standard within 12 months of plan submission.

   (No Response)

   1a. **If a district believes that it will be impossible to meet this standard within 12 months, it may apply for a waiver of this requirement, as described on the Smart Schools website. The waiver must be filed and approved by SED prior to submitting this survey.**

   ☐   By checking this box, you are certifying that the school district has an approved waiver of this requirement on file with the New York State Education Department.

2. **Connectivity Speed Calculator (Required). If the district currently meets the required speed, enter "Currently Met" in the last box: Expected Date When Required Speed Will be Met.**

	Number of Students	Required Speed in Mbps	Current Speed in Mbps	Expected Speed to be Attained Within 12 Months	Expected Date When Required Speed Will be Met
Calculated Speed	(No Response)	0.00	(No Response)	(No Response)	(No Response)

3. **Describe how you intend to use Smart Schools Bond Act funds for high-speed broadband and/or wireless connectivity projects in school buildings.**

   (No Response)

4. **Describe the linkage between the district's District Instructional Technology Plan and how the proposed projects will improve teaching and learning. (There should be a link between your response to this question and your responses to Question 1 in Section IV - NYSED Initiatives Alignment: "Explain how the district use of instructional technology will serve as a part of a comprehensive and sustained effort to support rigorous academic standards attainment and performance improvement for students."**

   Your answer should also align with your answers to the questions in Section II - Strategic Technology Planning and the associated Action Steps in Section III - Action Plan.)

   (No Response)

5. **If the district wishes to have students and staff access the Internet from wireless devices within the school building, or in close proximity to it, it must first ensure that it has a robust Wi-Fi network in place that has sufficient bandwidth to meet user demand.**

   Please describe how you have quantified this demand and how you plan to meet this demand.

   (No Response)

_____

Smart Schools Investment Plan - Revised - Islip Submission 1

School Connectivity

6. **Smart Schools plans with any expenditures in the School Connectivity category require a project number from the Office of Facilities Planning. Districts must submit an SSBA LOI and receive project numbers prior to submitting the SSIP. As indicated on the LOI, some projects may be eligible for a streamlined review and will not require a building permit.**
Please indicate on a separate row each project number given to you by the Office of Facilities Planning.

Project Number
(No Response)

7. **Certain high-tech security and connectivity infrastructure projects may be eligible for an expedited review process as determined by the Office of Facilities Planning.**

Was your project deemed eligible for streamlined review?

(No Response)

8. **Include the name and license number of the architect or engineer of record.**

Name	License Number
(No Response)	(No Response)

9. **Public Expenditures – Loanable (Counts toward the nonpublic loan calculation)**

Select the allowable expenditure type. Repeat to add another item under each type.	**PUBLIC** Items to be Purchased	Quantity	Cost Per Item	Total Cost
(No Response)	(No Response)	(No Response)	(No Response)	0.00
		0	0.00	0

10. **Public Expenditures – Non-Loanable (Does not count toward nonpublic loan calculation)**

Smart Schools Investment Plan - Revised - Islip Submission 1

Classroom Learning Technology

1.   **In order for students and faculty to receive the maximum benefit from the technology made available under the Smart Schools Bond Act, their school buildings must possess sufficient connectivity infrastructure to ensure that devices can be used during the school day. Smart Schools Investment Plans must demonstrate that sufficient infrastructure that meets the Federal Communications Commission's 100 Mbps per 1,000 students standard currently exists in the buildings where new devices will be deployed, or is a planned use of a portion of Smart Schools Bond Act funds, or is under development through another funding source.**
Smart Schools Bond Act funds used for technology infrastructure or classroom technology investments must increase the number of school buildings that meet or exceed the minimum speed standard of 100 Mbps per 1,000 students and staff within 12 months. This standard may be met on either a contracted 24/7 firm service or a "burstable" capability. If the standard is met under the burstable criteria, it must be:
1. Specifically codified in a service contract with a provider, and
2. Guaranteed to be available to all students and devices as needed, particularly during periods of high demand, such as computer-based testing (CBT) periods.
Please describe how your district already meets or is planning to meet this standard within 12 months of plan submission.

- According to industry standards, adequate infrastructure translates to 100 Megabits per second (Mbps) per 1,000 students, ensuring sufficient high-speed Internet access
- Islip's total student population is under 2,800 students. Our current internet connection is 500 Mbps.
- We will include funds to budget for redundant internet connection of 500Mbps; this would provide additional capacity and redundancy in the event our main provider goes down. We can do this with our existing provider, with minimal downtime, and without any hardware or istallation costs. Costs for this will be budgeted in our 2021-2022 General Fund.

1a.   **If a district believes that it will be impossible to meet this standard within 12 months, it may apply for a waiver of this requirement, as described on the Smart Schools website. The waiver must be filed and approved by SED prior to submitting this survey.**

☐   By checking this box, you are certifying that the school district has an approved waiver of this requirement on file with the New York State Education Department.

2.   **Connectivity Speed Calculator (Required). If the district currently meets the required speed, enter "Currently Met" in the last box: Expected Date When Required Speed Will be Met.**

	Number of Students	Required Speed in Mbps	Current Speed in Mbps	Expected Speed to be Attained Within 12 Months	Expected Date When Required Speed Will be Met
Calculated Speed	2,717	271.70	500	500	Currently met

3.   **If the district wishes to have students and staff access the Internet from wireless devices within the school building, or in close proximity to it, it must first ensure that it has a robust Wi-Fi network in place that has sufficient bandwidth to meet user demand.**
Please describe how you have quantified this demand and how you plan to meet this demand.

During the fall semester, we have monitored our Internet usage and consistently bee <50% utilization, which leaves significan room for the addition of devices. In the event we need additional Internet bandwidth, we have the ability to double our bandwidth on demand with our existing provider, with minimal downtime, and without any hardward or installation costs. For the 2021-22 school year we anticipate adding a second, redundant ISP connection, which will double our bandwidth from either or both providers as needed. The cost for this will be budgeted in our General Fund. The district uses 802.11ac Meraki access points, each of which is rated at 1.75Gbps throughout or more. An access oi is istalled in every classroom or instructional space, with multiple APs in larger locations. This density ensure each access point is supporting a reasonable number of wireless devices and is not overloaded by trying to serve too many concurrent clients.

Smart Schools Investment Plan - Revised - Islip Submission 1

Classroom Learning Technology

4. **All New York State public school districts are required to complete and submit an Instructional Technology Plan survey to the New York State Education Department in compliance with Section 753 of the Education Law and per Part 100.12 of the Commissioner's Regulations.**
    Districts that include educational technology purchases as part of their Smart Schools Investment Plan must have a submitted and approved Instructional Technology Plan survey on file with the New York State Education Department.

    ☑   By checking this box, you are certifying that the school district has an approved Instructional Technology Plan survey on file with the New York State Education Department.

5. **Describe the devices you intend to purchase and their compatibility with existing or planned platforms or systems. Specifically address the adequacy of each facility's electrical, HVAC and other infrastructure necessary to install and support the operation of the planned technology.**

    We plan on purchasing 587 Latitude 3310 Dell laptops for the District. We recently purchased over 100 of these laptops and they have performed well on our network. These laptops are general purpose Windows laptops that do not place any unusual demands on electrical service or HVAC. They are the same model we have successfully used with many students over the past year, and as such, we have direct experience with the impact they will have on the district's electric and HVAC infrastructure. After reviewing our planned device expansion with the staff from our facilities department, we are confident that we have sufficient capacity, especially in light of recent bond work which upgraded the electrical service to multiple buildings.

6. **Describe how the proposed technology purchases will:**
    - **> enhance differentiated instruction;**
    - **> expand student learning inside and outside the classroom;**
    - **> benefit students with disabilities and English language learners; and**
    - **> contribute to the reduction of other learning gaps that have been identified within the district.**

    The expectation is that districts will place a priority on addressing the needs of students who struggle to succeed in a rigorous curriculum. Responses in this section should specifically address this concern and align with the district's Instructional Technology Plan (in particular Question 2 of E. Curriculum and Instruction: "Does the district's instructional technology plan address the needs of students with disabilities to ensure equitable access to instruction, materials and assessments?" and Question 3 of the same section: "Does the district's instructional technology plan address the provision of assistive technology specifically for students with disabilities to ensure access to and participation in the general curriculum?")
    In addition, describe how the district ensures equitable access to instruction, materials and assessments and participation in the general curriculum for both SWD and English Language Learners/Multilingual Learners (ELL/MLL) students.

    By allocating devices to our secondary students so that each student has a device, we will have the ability to differentiate on a much broader scope than is possible with traditional pen/pencil instruction. For example, in addition to differentiating based on ability, we would also have the capability to differentiate based on a student's accessibility needs. The Microsoft Office Suite and Google G-Suite have accessibility tools to meet the needs of *all* learners. Tools like text contrast, speech to text, and language translation, all allow learners to meet success. On the academic side of instruction, teachers have the ability to distribute multiple assignments to students in a much simpler fashion, and can confer with students on the fly at any time of day within the documents being created or through tools like Microsoft Teams and Google Classroom.

    Through the use of technology, students will be able to expand their learning both inside and outside the classroom by thinking critically about the tools they need to solve a problem. In an age where inquiry based learning is the primary means of instruction, students are often tasked with finding solutions to problems or issues that they need to work out collaboratively and discuss. On-demand collaboration through teams and Google Classroom allow students to select a particular software tool to use and create content for authentic audiences. They can accomplish this with their peers through the collaborative functions of these powerful software tools. Using devices also provides students with the opportunity to practice being good digital citizens. By utilizing the Common Sense Media platform and other tools, teachers can help students to become responsible consumers and generators of online materials, and the studens will learn appropriate online behavior.

    English language learners and students with disabilities will benefit from this access to technology. The Microsoft Office Suite and Google G-Suite have accessibility tools to meet the needs of all learners. Tools like text contrast, speech to text, and language translation all allow learners to meet success. Additionally, when students have devices, they don't have to be concerned about the fine motor skills necessary for handwriting, often putting students on a level playing field with their peers. English language learners, can access tools to translate for purposes of both encoding and decoding, as well as provide access to vocabulary and syntax tools.

    The Islip School District has purchased a variety of online tools that are designed to customize instruction for each student. Through online tools such as iReady, Scholastic Literacy Pro, Achieve 3000, and Castle Learning, teachers are able to consistently assess and gather data on their students to better understand their specific needs. These assessment tools provide needed feedback in the areas of English Language Arts, math, science, and social studies. Once teachers examine the data, they are able to differentiate their instruction based on each student's needs, and they can then formulate instruction that is apropriate for that unique student.

7. **Where appropriate, describe how the proposed technology purchases will enhance ongoing communication with parents and other stakeholders and help the district facilitate technology-based regional partnerships, including distance learning and other efforts.**

    Technology provides a means of communicating with students, parents, and other stakeholders. In terms of student communication, tools within Microsoft Teams and Google Classroom allow teachers to communicate with students in real-time, and students can also communicate with their peers as well. By using the online tools for instructional purposes, student work and progress is consistently updated within the learning patforms; this gives parents the opportunity to check student progress, see work samples, and consequently, reach out to teachers about any concerns they may have in a timely manner. These online learning platforms are not feasibile in an enviromment that is not 1:1 with reliable devices. The use of technology also affords us the opportunity to collaborate with outside organizations and speakers; hosting live Skype or Zoom sessions allows for virtual assemblies, guest speakers, and virtual field trips. In the future, we are also exploring the use of platforms such as Kid-OYO which allow for distance learning opportunities such as computer programming and coding classes. Remote learning will open up our secondary course catlogue to provide students with courses that don't exist because we don't have the stff to teach it. A good example of this is in the area of foreign language. We have students interested in learning Mandarin, Farsi, and Urdu, but do not have any teachers who can teach these languages. Adding a remote option will open up so many new fields.

8. **Describe the district's plan to provide professional development to ensure that administrators, teachers and staff can employ the technology purchased to enhance instruction successfully.**

    Note: This response should be aligned and expanded upon in accordance with your district's response to Question 1 of F. Professional Development of your Instructional Technology Plan: "Please provide a summary of professional development offered to teachers and staff, for the time period covered by this plan, to support technology to enhance teaching and learning. Please include topics, audience and method of delivery within your summary."

    Islip School District has a full time teacher devoted to helping teachers learn technology for both instruction and student management record keeping. We are also part of the Microsoft Educator Community. Teachers can choose from dozens of courses that are given on an ongoing basis. The district is also part of the Model Schools Program through Eastern Suffolk BOCES. Model Schools offers workshops, visitations, and one-to-one instruction on new platforms, software, and existing programs. Last year, our teachers were offered over 100 workshops. Each year, the district devotes three days to professional development on Superintendent's Conference Days. Over the past three years, over half of the time allotted on those days are devoted to technology. All of our secondary teachers have now received training on Microsoft Teams as well as all Microsoft 365 tools.

9. **Districts must contact one of the SUNY/CUNY teacher preparation programs listed on the document on the left side of the page that supplies the largest number of the district's new teachers to request advice on innovative uses and best practices at the intersection of pedagogy and educational technology.**

    ☑   By checking this box, you certify that you have contacted the SUNY/CUNY teacher preparation program that supplies the largest number of your new teachers to request advice on these issues.

    9a. **Please enter the name of the SUNY or CUNY Institution that you contacted.**

    Stony Brook University

    9b. **Enter the primary Institution phone number.**

    631-632-7075

    9c. **Enter the name of the contact person with whom you consulted and/or will be collaborating with on innovative uses of technology and best practices.**

    Linda Padwa

10. **To ensure the sustainability of technology purchases made with Smart Schools funds, districts must demonstrate a long-term plan to maintain and replace technology purchases supported by Smart Schools Bond Act funds. This sustainability plan shall demonstrate a district's capacity to support recurring costs of use that are ineligible for Smart Schools Bond Act funding such as device maintenance, technical support, Internet and wireless fees, maintenance of hotspots, staff professional development, building maintenance and the replacement of incidental items. Further, such a sustainability plan shall include a long-term plan for the replacement of purchased devices and equipment at the end of their useful life with other funding sources.**

    ☑   By checking this box, you certify that the district has a sustainability plan as described above.

11. **Districts must ensure that devices purchased with Smart Schools Bond funds will be distributed, prepared for use, maintained and supported appropriately. Districts must maintain detailed device inventories in accordance with generally accepted accounting principles.**

    ☑   By checking this box, you certify that the district has a distribution and inventory management plan and system in place.

12. **Please detail the type, quantity, per unit cost and total cost of the eligible items under each sub-category.**

Select the allowable expenditure type. Repeat to add another item under each type.	Item to be Purchased	Quantity	Cost per Item	Total Cost
Laptop Computers	Dell Latitude 3310	587	553.42	324,857.54
		587	**553.42**	**324,858**

Pre-Kindergarten Classrooms

1. **Provide information regarding how and where the district is currently serving pre-kindergarten students and justify the need for additional space with enrollment projections over 3 years.**

(No Response)

2. **Describe the district's plan to construct, enhance or modernize education facilities to accommodate pre-kindergarten programs. Such plans must include:**

- Specific descriptions of what the district intends to do to each space;
- An affirmation that new pre-kindergarten classrooms will contain a minimum of 900 square feet per classroom;
- The number of classrooms involved;
- The approximate construction costs per classroom; and
- Confirmation that the space is district-owned or has a long-term lease that exceeds the probable useful life of the improvements.

(No Response)

3. **Smart Schools Bond Act funds may only be used for capital construction costs. Describe the type and amount of additional funds that will be required to support ineligible ongoing costs (e.g. instruction, supplies) associated with any additional pre-kindergarten classrooms that the district plans to add.**

(No Response)

4. **All plans and specifications for the erection, repair, enlargement or remodeling of school buildings in any public school district in the State must be reviewed and approved by the Commissioner. Districts that plan capital projects using their Smart Schools Bond Act funds will undergo a Preliminary Review Process by the Office of Facilities Planning.**

Please indicate on a separate row each project number given to you by the Office of Facilities Planning.

Project Number

Replace Transportable Classrooms

1. **Describe the district's plan to construct, enhance or modernize education facilities to provide high-quality instructional space by replacing transportable classrooms.**

(No Response)

2. **All plans and specifications for the erection, repair, enlargement or remodeling of school buildings in any public school district in the State must be reviewed and approved by the Commissioner. Districts that plan capital projects using their Smart Schools Bond Act funds will undergo a Preliminary Review Process by the Office of Facilities Planning.**

Please indicate on a separate row each project number given to you by the Office of Facilities Planning.

Project Number
(No Response)

3. **For large projects that seek to blend Smart Schools Bond Act dollars with other funds, please note that Smart Schools Bond Act funds can be allocated on a pro rata basis depending on the number of new classrooms built that directly replace transportable classroom units.**

If a district seeks to blend Smart Schools Bond Act dollars with other funds describe below what other funds are being used and what portion of the money will be Smart Schools Bond Act funds.

(No Response)

4. **Please detail the type, quantity, per unit cost and total cost of the eligible items under each sub-category.**

Select the allowable expenditure type. Repeat to add another item under each type.	Item to be purchased	Quantity	Cost per Item	Total Cost
(No Response)	(No Response)	(No Response)	(No Response)	0.00
		0	**0.00**	**0**

5. **If you have made an allocation for Replace Transportable Classrooms, complete this table.**
Note that the calculated Total at the bottom of the table must equal the Total allocation for this category that you entered in the SSIP Overview overall budget.

	Sub-Allocation
Construct New Instructional Space	(No Response)
Enhance/Modernize Existing Instructional Space	(No Response)
Other Costs	(No Response)
Totals:	**0.00**

Smart Schools Investment Plan - Revised - Islip Submission 1

High-Tech Security Features

1. **Describe how you intend to use Smart Schools Bond Act funds to install high-tech security features in school buildings and on school campuses.**

(No Response)

2. **All plans and specifications for the erection, repair, enlargement or remodeling of school buildings in any public school district in the State must be reviewed and approved by the Commissioner. Smart Schools plans with any expenditures in the High-Tech Security category require a project number from the Office of Facilities Planning. Districts must submit an SSBA LOI and receive project numbers prior to submitting the SSIP. As indicated on the LOI, some projects may be eligible for a streamlined review and will not require a building permit.**
Please indicate on a separate row each project number given to you by the Office of Facilities Planning.

Project Number
(No Response)

3. **Was your project deemed eligible for streamlined Review?**

☐ Yes
☐ No

4. **Include the name and license number of the architect or engineer of record.**

Name	License Number
