1a.	Please enter their phone number for follow up questions.
	716-626-8012
1b.	Please enter their e-mail address for follow up contact.
	tmaturski@williamsvillek12.org
	se indicate below whether this is the first submission, a new or supplemental submission or an amended nission of a Smart Schools Investment Plan.
F	irst submission
Plan per I wire Plan Educ By c	ew York State public school districts are required to complete and submit a District Instructional Technology survey to the New York State Education Department in compliance with Section 753 of the Education Law and Part 100.12 of the Commissioner's Regulations. Districts that include investments in high-speed broadband or less connectivity and/or learning technology equipment or facilities as part of their Smart Schools Investment must have a submitted and approved Instructional Technology Plan survey on file with the New York State cation Department.  The complete and submitted and approved Instructional Technology Plan survey on file with the New York State cation Department.
	ey on file with the New York State Education Department.
Purs pare distr By c	hecking the boxes below, you are certifying that you have engaged with those required stakeholders. Each
	must be checked prior to submitting your Smart Schools Investment Plan.  arents feachers tudents formunity members  If your district contains non-public schools, have you provided a timely opportunity for consultation with thes stakeholders?  Yes
	□ No □ N/A
	fy that the following required steps have taken place by checking the boxes below: Each box must be checked to submitting your Smart Schools Investment Plan.
	The district developed and the school board approved a preliminary Smart Schools Investment Plan.  The preliminary plan was posted on the district website for at least 30 days. The district included an address to which any written comments on the plan should be sent.  The school board conducted a hearing that enabled stakeholders to respond to the preliminary plan. This hearing may have occured as part of a cormal Board meeting, but adequate notice of the event must have been provided through local media and the district website for at least two weeks prior to the meeting.  The district prepared a final plan for school board approval and such plan has been approved by the school board.  The final proposed plan that has been submitted has been posted on the district's website.
	Please Thom  1a.  1b.  Please submediate Finance Finan

## **Smart Schools Investment Plan - WCSD SBIP 1**

SSIP Overview

Page Last Modified: 01/27/2017

5a. Please upload the proposed Smart Schools Investment Plan (SSIP) that was posted on the district's website, along with any supporting materials. Note that this should be different than your recently submitted Educational Technology Survey. The Final SSIP, as approved by the School Board, should also be posted on the website and remain there during the course of the projects contained therein.

Status Date: 01/27/2017 04:28 PM

Smart Bonds Act Investment Plan Final.docx

5b. Enter the webpage address where the final Smart Schools Investment Plan is posted. The Plan should remain posted for the life of the included projects.

http://www.williamsvillek12.org/departments/technology\_services/2012-2015\_technology\_plan.php

6. Please enter an estimate of the total number of students and staff that will benefit from this Smart Schools Investment Plan based on the cumulative projects submitted to date.

12,000

- 7. An LEA/School District may partner with one or more other LEA/School Districts to form a consortium to pool Smart Schools Bond Act funds for a project that meets all other Smart School Bond Act requirements. Each school district participating in the consortium will need to file an approved Smart Schools Investment Plan for the project and submit a signed Memorandum of Understanding that sets forth the details of the consortium including the roles of each respective district.
  - ☐ The district plans to participate in a consortium to partner with other school district(s) to implement a Smart Schools project.
- 8. Please enter the name and 6-digit SED Code for each LEA/School District participating in the Consortium.

Partner LEA/District	SED BEDS Code
(No Response)	(No Response)

9. Please upload a signed Memorandum of Understanding with all of the participating Consortium partners.

(No Response)

10. Your district's Smart Schools Bond Act Allocation is:

\$3,474,731

11. Enter the budget sub-allocations by category that you are submitting for approval at this time. If you are not budgeting SSBA funds for a category, please enter 0 (zero.) If the value entered is \$0, you will not be required to complete that survey question.

	Sub- Allocations
School Connectivity	3,474,731
Connectivity Projects for Communities	0
Classroom Technology	0
Pre-Kindergarten Classrooms	0
Replace Transportable Classrooms	0
High-Tech Security Features	0
Totals:	3,474,731

### Smart Schools Investment Plan - WCSD SBIP 1

School Connectivity

Page Last Modified: 01/27/2017

1. In order for students and faculty to receive the maximum benefit from the technology made available under the Smart Schools Bond Act, their school buildings must possess sufficient connectivity infrastructure to ensure that devices can be used during the school day. Smart Schools Investment Plans must demonstrate that:

Status Date: 01/27/2017 04:28 PM

- sufficient infrastructure that meets the Federal Communications Commission's 100 Mbps per 1,000 students standard currently exists in the buildings where new devices will be deployed, or
- is a planned use of a portion of Smart Schools Bond Act funds, or
- is under development through another funding source.

Smart Schools Bond Act funds used for technology infrastructure or classroom technology investments must increase the number of school buildings that meet or exceed the minimum speed standard of 100 Mbps per 1,000 students and staff within 12 months. This standard may be met on either a contracted 24/7 firm service or a "burstable" capability. If the standard is met under the burstable criteria, it must be:

- 1. Specifically codified in a service contract with a provider, and
- 2. Guaranteed to be available to all students and devices as needed, particularly during periods of high demand, such as computer-based testing (CBT) periods.

Please describe how your district already meets or is planning to meet this standard within 12 months of plan submission.

The Williamsville Central School District currently has a 10 GB connection speed between school buildings. The District has a 1 GB connection from the external source for internet access. Our current BEDS day enrollment as of the 2015-16 school year is 9,976 students. The enrollment results in 100.24 Mbps connection speed per 1,000 students in our district. This meets the connection speed requirement for the Smart Schools Bond Act. Additionally, the 2015-16 long-term enrollment forecast shows that our district's future enrollment will decrease by 4.7% in the next five years. This decrease will increase the connection speed per 1,000 students for the District.

- 1a. If a district believes that it will be impossible to meet this standard within 12 months, it may apply for a waiver of this requirement, as described on the Smart Schools website. The waiver must be filed and approved by SED prior to submitting this survey.
  - □ By checking this box, you are certifying that the school district has an approved waiver of this requirement on file with the New York State Education Department.
- 2. Connectivity Speed Calculator (Required)

	Number of Students	100 Kbps	Divide by 1000 to Convert to Required Speed in Mb	in Mb	Speed to be Attained Within	Expected Date When Required Speed Will be Met
Calculated Speed	9,976	997,600	997.6	1000	1000	currently met

01/27/2017 04:30 PM Page 3 of 19

School Connectivity

Page Last Modified: 01/27/2017

3. Describe how you intend to use Smart Schools Bond Act funds for high-speed broadband and/or wireless connectivity projects in school buildings.

#### Access Points - Methodology

When addressing the need to increase the wireless network the district is going to change the access locations from central points that currently are meant to serve multiple classrooms to providing an access point in every classroom. The district is also going to add multiple access points in locations that may be used for online testing. The objective is to provide close to one hundred percent coverage in our school buildings with expanded coverage in spaces that will be designated as large area testing locations. These spaces will receive multiple access points. The usage of multiple units will eliminate delayed connection and processing time for students during assessments. The specifications for the wireless access point unit that will be dual band radio a/c speed of 2.4-5.0 Ghtz. The new access points will improve the future capability of the district thereby reducing the fact that the units become obsolete due to their inability to receive data due to changing industry standards.

Status Date: 01/27/2017 04:28 PM

#### Project Bandwidth - Methodology

The District is not actively contemplating a change in the bandwidth capability due to the fact that our student enrollment is decreasing. The District is continuing to investigate redundancy and disaster recovery initiatives that will insure our network survivability.

#### **Project Wiring - Methodology**

In order to meet the higher demand for wireless connectivity to our system there is a need to add new wiring and upgrade identified old wiring that is needed to handle the data speed and use requirements. The minimum rated wire to be installed will be CAT6.

#### Network switch Infrastructure - Methodology

The District will replace all district switches. The switches are currently five years old and when the replacement begins they will be seven years old. The new switches will be either ninety-six or forty-eight port devices. The processing speed will be capable of providing 1/10 GB speed. The switches will be mounted in racks and plugged into power distribution units in each location.

School Connectivity

Page Last Modified: 01/27/2017

4. Describe the linkage between the district's District Instructional Technology Plan and the proposed projects. (There should be a link between your response to this question and your response to Question 1 in Part E. Curriculum and Instruction "What are the district's plans to use digital connectivity and technology to improve teaching and learning?)

Status Date: 01/27/2017 04:28 PM

#### Williamsville Central School District Instructional Program's Purpose for Enhanced Connectivity:

The Williamsville Central School District has implemented a wired and wireless connectivity infrastructure in each school building in order to support student programs. The District's first technology project focused on creating a wired Local Area Network in 2005. This project focused on adding wired connectivity to all three high school buildings and our four middle schools. The connectivity at our six elementary schools was completed by district electricians. The next major technology capital project occurred in 2009. This project involved the renovation of the District's main server room and the replacements of all switches in the district. Major improvements included adding appropriate air conditioning to the server room which resulted in a need to expand the space for additional servers and the other technology equipment. This project also included the upgrading of the switches in schools. These two prior projects addressed connectivity needs in the district. Both projects supported the wired locations of ports in classrooms, computer labs, and school offices. Over the last five years the district has installed wireless access points in our schools in central locations. The installation process was reactionary to requests from the instruction department and our schools. These installations were completed by district staff and the selected access locations were hallways and other open areas in the building. The intent was to provide broad coverage in each school building. Presently, all thirteen school buildings have the capability to provide wireless access to students and staff. However, the current wireless system is unable to accommodate the higher volume of devices that have been provided to students. The short-comings of the District's wireless system has become clear with the challenges it has faced in providing network connections to the district's middle schools for its 1:1 student issued device program. Our current wireless system has become overwhelmed by the number of users attempting to sign-on to the network through the centrally located access points. This has resulted in sign-on delays and students encountering slow processing times for their class work. In addition to the technology growth at the middle school level there is similar growth at the elementary and high school levels. The issuance of a 1:1 device program for students at these levels is not planned to occur at this point in time. However, the plan for new access points at these schools is in included in the Smart Bond Act Investment Plan. In addition to providing a major improvement in device access this investment plan will also fully support online testing.

The expansion of the District's wireless system will also allow the district to comply with future New York State Education Department online testing requirements. Presently, the district does not have enough wireless connectivity to support this initiative. The District will add multiple access points to gyms, cafeterias, libraries, and other areas that could be used as a central testing location ins our schools.

Response to note:

The school connectivity plan links to our ITP via Curriculum Technology Integration goals. Connectivity will allow the distirct to allow students to better interpret and derive meaning from digital media; Enhance their ability to produce and publish writing for an authentic audience; Assess the credibility and accuracy of digital media to enhance understanding of findings, reasoning, and evidence to add interest; Students will be able to actively engage in appropriate online behavior; Students will be able to utilize appropriate internet tools to enhance and streamline their learning. In regard to Technology delivery the connectivity project clearly aligns to our ability to support our 1:1 mobile device initiative at our four middle schools. The mobile device usage is also being expanded at the elementary and high school levels. The connectivity program will allow this to occur.

5. If the district wishes to have students and staff access the Internet from wireless devices within the school building, or in close proximity to it, it must first ensure that it has a robust Wi-Fi network in place that has sufficient bandwidth to meet user demand.

Please describe how you have quantified this demand and how you plan to meet this demand.

The Williamsville Central School District currently has a 10 GB connection speed between school buildings. The District has a 1 GB connection from the external source for internet access. Our current BEDS day enrollment as of the 2015-16 school year is 9,976 students. The enrollment results in 100.24 Mbps connection speed per 1,000 students in our district. This meets the connection speed requirement for the Smart Schools Bond Act. Additionally, the 2015-16 long-term enrollment forecast shows that our district's future enrollment will decrease by 4.7% in the next five years. This decrease will increase the connection speed per 1,000 students for the District.

6. As indicated on Page 5 of the guidance, the Office of Facilities Planning will have to conduct a preliminary review of all capital projects, including connectivity projects.

Please indicate on a separate row each project number given to you by the Office of Facilities Planning.

01/27/2017 04:30 PM Page 5 of 19

School Connectivity

Project Number		
14020306799906		

Status Date: 01/27/2017 04:28 PM

7. Certain high-tech security and connectivity infrastructure projects may be eligible for an expedited review process as determined by the Office of Facilities Planning.

Was your project deemed eligible for streamlined review?

No

8. Include the name and license number of the architect or engineer of record.

Name	License Number		
Peter Vom Scheidt	62660		

9. If you are submitting an allocation for School Connectivity complete this table.
Note that the calculated Total at the bottom of the table must equal the Total allocation for this category that you entered in the SSIP Overview overall budget.

	Sub- Allocation
Network/Access Costs	2,087,280
Outside Plant Costs	(No Response)
School Internal Connections and Components	1,128,320
Professional Services	244,131
Testing	(No Response)
Other Upfront Costs	(No Response)
Other Costs	15,000
Totals:	3,474,731

Please detail the type, quantity, per unit cost and total cost of the eligible items under each sub-category. This is especially important for any expenditures listed under the "Other" category. All expenditures must be eligible for tax-exempt financing to be reimbursed through the SSBA. Sufficient detail must be provided so that we can verify this is the case. If you have any questions, please contact us directly through smartschools@nysed.gov. NOTE: Wireless Access Points should be included in this category, not under Classroom Educational Technology, except those that will be loaned/purchased for nonpublic schools.
Add rows under each sub-category for additional items, as needed.

Classroom Learning Technology

Page Last Modified: 01/26/2017

1. In order for students and faculty to receive the maximum benefit from the technology made available under the Smart Schools Bond Act, their school buildings must possess sufficient connectivity infrastructure to ensure that devices can be used during the school day. Smart Schools Investment Plans must demonstrate that sufficient infrastructure that meets the Federal Communications Commission's 100 Mbps per 1,000 students standard currently exists in the buildings where new devices will be deployed, or is a planned use of a portion of Smart Schools Bond Act funds, or is under development through another funding source.

Status Date: 01/27/2017 04:28 PM

Smart Schools Bond Act funds used for technology infrastructure or classroom technology investments must increase the number of school buildings that meet or exceed the minimum speed standard of 100 Mbps per 1,000 students and staff within 12 months. This standard may be met on either a contracted 24/7 firm service or a "burstable" capability. If the standard is met under the burstable criteria, it must be:

- 1. Specifically codified in a service contract with a provider, and
- 2. Guaranteed to be available to all students and devices as needed, particularly during periods of high demand, such as computer-based testing (CBT) periods.

Please describe how your district already meets or is planning to meet this standard within 12 months of plan submission.

(No Response)

- 1a. If a district believes that it will be impossible to meet this standard within 12 months, it may apply for a waiver of this requirement, as described on the Smart Schools website. The waiver must be filed and approved by SED prior to submitting this survey.
  - □ By checking this box, you are certifying that the school district has an approved waiver of this requirement on file with the New York State Education Department.
- 2. Connectivity Speed Calculator (Required)

	Number of Students	Multiply by 100 Kbps	Divide by 1000 to Convert to Required Speed in Mb	Current Speed in Mb	Expected Speed to be Attained Within 12 Months	Expected Date When Required Speed Will be Met
Calculated Speed	(No Response)	(No Response)	(No Response)	(No Response)	(No Response)	(No Response)

3. If the district wishes to have students and staff access the Internet from wireless devices within the school building, or in close proximity to it, it must first ensure that it has a robust Wi-Fi network in place that has sufficient bandwidth to meet user demand.

Please describe how you have quantified this demand and how you plan to meet this demand.

(No Response)

4. All New York State public school districts are required to complete and submit an Instructional Technology Plan survey to the New York State Education Department in compliance with Section 753 of the Education Law and per Part 100.12 of the Commissioner's Regulations.

Districts that include educational technology purchases as part of their Smart Schools Investment Plan must have a submitted and approved Instructional Technology Plan survey on file with the New York State Education Department.

☐ By checking this box, you are certifying that the school district has an approved Instructional Technology Plan survey on file with the New York State Education Department.

Classroom Learning Technology

Page Last Modified: 01/26/2017

Describe the devices you intend to purchase and their compatibility with existing or planned platforms or systems.
 Specifically address the adequacy of each facility's electrical, HVAC and other infrastructure necessary to install and support the operation of the planned technology.

Status Date: 01/27/2017 04:28 PM

(No Response)

- 6. Describe how the proposed technology purchases will:
  - > enhance differentiated instruction;
  - > expand student learning inside and outside the classroom;
  - > benefit students with disabilities and English language learners; and
  - > contribute to the reduction of other learning gaps that have been identified within the district.

The expectation is that districts will place a priority on addressing the needs of students who struggle to succeed in a rigorous curriculum. Responses in this section should specifically address this concern and align with the district's Instructional Technology Plan (in particular Question 2 of E. Curriculum and Instruction: "Does the district's instructional technology plan address the needs of students with disabilities to ensure equitable access to instruction, materials and assessments?" and Question 3 of the same section: "Does the district's instructional technology plan address the provision of assistive technology specifically for students with disabilities to ensure access to and participation in the general curriculum?"

(No Response)

7. Where appropriate, describe how the proposed technology purchases will enhance ongoing communication with parents and other stakeholders and help the district facilitate technology-based regional partnerships, including distance learning and other efforts.

(No Response)

Describe the district's plan to provide professional development to ensure that administrators, teachers and staff
can employ the technology purchased to enhance instruction successfully.

Note: This response should be aligned and expanded upon in accordance with your district's response to Question 1 of F. Professional Development of your Instructional Technology Plan: "Please provide a summary of professional development offered to teachers and staff, for the time period covered by this plan, to support technology to enhance teaching and learning. Please include topics, audience and method of delivery within your summary."

(No Response)

- Districts must contact the SUNY/CUNY teacher preparation program that supplies the largest number of the district's new teachers to request advice on innovative uses and best practices at the intersection of pedagogy and educational technology.
  - ☐ By checking this box, you certify that you have contacted the SUNY/CUNY teacher preparation program that supplies the largest number of your new teachers to request advice on these issues.
  - 9a. Please enter the name of the SUNY or CUNY Institution that you contacted.

(No Response)

9b. Enter the primary Institution phone number.

Pre-Kindergarten Classrooms

Page Last Modified: 06/02/2016

 Provide information regarding how and where the district is currently serving pre-kindergarten students and justify the need for additional space with enrollment projections over 3 years.

Status Date: 01/27/2017 04:28 PM

(No Response)

- 2. Describe the district's plan to construct, enhance or modernize education facilities to accommodate prekindergarten programs. Such plans must include:
  - Specific descriptions of what the district intends to do to each space;
  - An affirmation that pre-kindergarten classrooms will contain a minimum of 900 square feet per classroom;
  - The number of classrooms involved;
  - The approximate construction costs per classroom; and
  - Confirmation that the space is district-owned or has a long-term lease that exceeds the probable useful life of the improvements.

(No Response)

Smart Schools Bond Act funds may only be used for capital construction costs. Describe the type and amount of
additional funds that will be required to support ineligible ongoing costs (e.g. instruction, supplies) associated with
any additional pre-kindergarten classrooms that the district plans to add.

(No Response)

4. All plans and specifications for the erection, repair, enlargement or remodeling of school buildings in any public school district in the State must be reviewed and approved by the Commissioner. Districts that plan capital projects using their Smart Schools Bond Act funds will undergo a Preliminary Review Process by the Office of Facilities Planning.

Please indicate on a separate row each project number given to you by the Office of Facilities Planning.

Project Number

If you have made an allocation for Pre-Kindergarten Classrooms, complete this table.
 Note that the calculated Total at the bottom of the table must equal the Total allocation for this category that you entered in the SSIP Overview overall budget.

	Sub-Allocation
Construct Pre-K Classrooms	(No Response)
Enhance/Modernize Educational Facilities	(No Response)
Other Costs	(No Response)
Totals:	0

Please detail the type, quantity, per unit cost and total cost of the eligible items under each sub-category. This is especially important for any expenditures listed under the "Other" category. All expenditures must be capital-bond eligible to be reimbursed through the SSBA. If you have any questions, please contact us directly through smartschools@nysed.gov.

Add rows under each sub-category for additional items, as needed.

Status Date: 01/27/2017 04:28 PM

 For large projects that seek to blend Smart Schools Bond Act dollars with other funds, please note that Smart Schools Bond Act funds can be allocated on a pro rata basis depending on the number of new classrooms built that directly replace transportable classroom units.

If a district seeks to blend Smart Schools Bond Act dollars with other funds describe below what other funds are being used and what portion of the money will be Smart Schools Bond Act funds.

(No Response)

4. If you have made an allocation for Replace Transportable Classrooms, complete this table. Note that the calculated Total at the bottom of the table must equal the Total allocation for this category that you entered in the SSIP Overview overall budget.
