

Equipment and Supplies

“New” guidance just came out pertaining to repurposing equipment or supplies. It replaced the previous version at <https://www2.ed.gov/documents/coronavirus/covid19-repurposing-equipment-supplies.pdf>. The exception granted by Office of Management and Budget (OMB) is to continue to allow sub-grantees to use equipment or supplies for other education purposes, for example, laptops purchased for a Federal program that are not being used for the intended purpose. The facts sheet outlines the recordkeeping and inventory responsibilities of the sub-grantee and does not permit the purchase of new equipment or supplies for purposes not aligned with the allowable activities of the program.

This “new” authority extends through June 30, 2021.
